

Rebecca Osborne, White River Junction, VT.  
Hello,

I am a resident of Hartford VT and I am writing to encourage you to consider the following during the relicensure process for the Wilder Dam.

I am strongly in support the Town of Hartford's request to consider the following requirements of Great River Hydro: Require Great River Hydro to fund the implementation of the Kilowat Master Plan and reimburse the Town of Hartford for annual operating costs of the park. Address a Decommissioning Plan for the Wilder Dam. Support working with a land trust to create conservation easements throughout portions of the property. Open the access across the dam that reconnects VT with NH. Address bank erosion concerns brought forth by Connecticut River Conservancy.

These considerations are vital in supporting the town, the river's ecosystems, and the quality of life for local residents.

Thank you,

Becca Osborne
