

Chuck Wooster, White River Junction, VT.

As part of the relicensing of the Wilder Dam in Hartford, VT and Lebanon, NH, I encourage you to reopen the pedestrian walkway across the dam that links these two communities. This walkway already exists. By reopening it, you'll be linking two significant public green spaces - Boston Lot on the new Hampshire side and Kilowatt Park on the Vermont side - while also creating a key linkage across the river for bicyclists who already enjoy cycling on NH Route 10 and Vermont Route 5. Returning this walkway to public access would be a wonderful gift to the people of the Upper Valley.
