

Jennifer Freise, West Lebanon, NH.

I am a resident of West Lebanon who lives close to the Wilder Dam. I support the town of Hartford's request to have Great River Hydro financially contribute towards maintenance and improvement of the public areas around the dam. I'm also in support of the opening of a public path on the dam so that pedestrians and cyclists can cross the Connecticut there. I'd also like for there to be more clearly marked and better maintained portage paths around the dam for canoeists and kayakers. The natural areas and parks around the dam are beautiful and having them better maintained and more accessible will be beneficial to the community. Having more public pedestrian and bike paths linking together towns also helps build a future where cars are less necessary for routine trips to work or to recreational areas.
