

Elizabeth Bergstrom, Saxtons River, VT.

Hi, I live in Rockingham and it's important to me to have healthy wildlife populations as part of what makes Vermont a great place to live. I'm a longtime birdwatcher and I'm also concerned about habitat loss making it harder for birds to thrive. I want future generations to be able to see beautiful grassland birds like bobolinks and meadowlarks! I am asking that Great River Hydro continue delayed mowing at the Upper Meadow to support the birds breeding there. Thank you for your time.
