

Dr. Hector Galbraith, Dummerston, VT.

I am writing in reference to the relicensing of the Bellows Falls Dam (P-1855-050). I live in Windham County and I am concerned with the loss of wildlife habitat. Grassland bird species are declining rapidly due to the loss of nesting habitat. I request that Great River Hydro continue to delay-mow the Upper Meadows of Rockingham to support the grassland bird species nesting there.
