

Jessica Raymond, Wilder, VT.

Thank you for taking the time to read my comment. I am writing to advocate for pedestrian and bicycle (walked bicycles would be fine) access over the Wilder Dam. In addition to GREATLY expanding the recreational access by connecting the Boston Lot Reservoir with the Killowatt recreation areas, this access would open bike commuter trails between Wilder and the Dartmouth Hitchcock campus. In the long term, the Upper Valley needs to be working as a community to create sustainable transportation throughout the Upper Valley that acknowledges the need to move away from fossil fuels. Opening access to cross the river at this already existing dam would be a big step to connecting our communities with long term vision. Please allow access to cross the Wilder Dam by foot and bicycle. Thank you .
