Re: Great River Hydro, LLC's Corrected Erosion Study Report Supplemental Information, Project Nos. P-1892-026, 1855-045, and 1904-073

Dear Secretary Bose:

Great River Hydro, LLC ("Great River Hydro") is the owner and licensee of the Wilder Hydroelectric Project (FERC No. 1892), the Bellows Falls Hydroelectric Project (FERC No. 1855), and the Vernon Hydroelectric Project (FERC No. 1904). On October 31, 2012, TransCanada (the previous licensee) initiated the Integrated Licensing Process ("ILP") by filing with the Federal Energy Regulatory Commission ("FERC" or "Commission") its Notice of Intent to seek new licenses for each project, along with a separate Pre-Application Document for each project. The current licenses for these projects each expire on April 30, 2019.

On November 15, 2017 Great River Hydro submitted a supplemental study report for ILP Study 2/3 – Riverbank Transect and Riverbank Erosion Studies. After filing the report, Great River Hydro discovered an error in the report table of contents produced by use of a report template in the development of this report. The corrected supplemental study report is filed herewith.

Kimberly D. Bose, Secretary
