

Isabel Schroedel, Northampton, MA.

Please call for the hydropower companies to comply with Section 106 by engaging with Abenaki leaders completely and responsibly. Please also consider increasing funding and access to recreation and consider how this project will impact access to river-based recreation for local communities, and give back to the communities that live along this river these companies are privileged to use. Lastly, please put any action on hold until erosion studies have been completed and it is ensured that the projects will not have an impact on the erosion issues in this area, and if they will, require that companies not take action that will worsen the erosion. Thank you.
